

**Invitation**

It is our great pleasure to announce the third 'Spins, waves and Interactions' seminar in autumn 2016 in the picturesque town of Greifswald.

We prepared many interesting and exciting topics throughout solid state physics with a special focus on magnetism, spintronics and terahertz radiation. In addition to the talks and the poster session, the seminar will leave plenty of time for discussions and networking.

Venue

Greifswald University was founded 1456 and is one of the oldest universities in central Europe. Greifswald is part of the Hanseatic League and it radiates its maritime flair in one of the sunniest regions in Germany.

The seminar will take place and is graciously supported by the beautiful 'Krupp Kolleg,' which is situated in the historical center of the old university and city of Greifswald, right next to St. Nicholas' Cathedral. Street address: Martin-Luther-Straße 14, 17489 Greifswald.

Schedule

The seminar will start with a joint dinner on Wednesday Aug 31 at 7pm and the scientific program ends on Friday Sep 2 at 12.30pm. There is an excursion (kite surf class) planned for Friday afternoon and the following weekend (Saturday and Sunday).

The detailed program will consist of invited and contributed talks as well as posters.

Accommodation

Please make sure to book your hotel or other accommodation well in advance. There is no particular conference hotel, please find a hotel list online at <http://www.physik.uni-bielefeld.de/experi/d2/spins/>

Conference fee

There is no fee to attend the seminar. However, the dinner on Wednesday and Thursday has to be paid by everyone individually.

Registration

Please send your registration for the seminar until July 30, 2016 (at the latest) to Andy via: a.thomas@ifw-dresden.de

We look forward to seeing you all in autumn
